## Work History

---

**2020-02 - 2020-10**

### Full Stack Developer intern.

*TechStudio Academy, illupeju, Lagos.*

- Developed an in-house clone YouTube web app using Node, React, HTML/CSS that allowed users click, like and also comment on it.
- Worked across the software development life cycle to gather user requirements and build and maintain the code for the tool...
- Created Database that will be responsible for things like authentication and authorization to log in users and make sure they can access the right content.
- Developed individual routes for the application...
- Used: JavaScript (Node & React), HTML/CSS, PostgreSQL.

### PROJECT

#### Cryptocurrency Price Tracker

- Incorporated API calls to several applications and stored data efficiently in

PostgreSQL backend

- Utilized D3.js to allow users to dynamically visualize price movements over time periods of their choosing
- Used: JavaScript (Node & React), HTML/CSS.

**2021-01 - Current**

### **Engineer/Technical Assistant.**

*AG Dangote Construction, Ibeju Lekki, Lagos*

- Assessed individual survey project needs and planned workflows.
- Evaluated all work orders and project plans.
- Performed field calculations to complete assessments.
- Measurements, valuations, cost-control and reporting of projects in progress
- Liaison between fabricators, procurement, project construction management, site construction, project controls, quality lead, etc.
- Work closely with Safety and Health departments to assure the construction area, tooling and fixtures are designed ergonomically and safe
- Review quality records, test reports, and certify fabrication of various components of road construction
- Manage all or part of the engineering scope for a lump sum project
- Followed local, regional, and national guidelines.

**2016-06 - 2017-01**

### **Welding and Fabrication Engineer**

*Suameh Metalworks Nigeria Limited, Lagos/Badagry Expressway, Market Bus-stop Iyana Isashi, Ojo, Lagos.*

- Evaluated all work orders and projects plans.
- Prepared daily and weekly schedule.
- Supervise technicians assigned to the welding portion of project specifications and review new plans.
- Conducted quality analysis on all raw and fabricated materials.
- Used Shielded metal arc welding (SMAW) machine to weld some gates and gate pipes.
- Monitored material performance to determine and evaluate deterioration and product lifespan.
- Made proactive adjustments to policies and procedures to meet changing demands.
